How Can we Improve Endoscopic and Exoscopic Instrumentation

Alejandro Rivas, MD
Associate Chief of Otology and Neurotology
Director of Endoscopic Ear Surgery
Associate Professor Dept. Otolaryngology-HNS
Vanderbilt University Medical Center
Speaker Disclosure

Consultant for:
- Med-el
- Advance Bionics
- Cochlear
- Grace Medical
- Stryker
- Cook Medical
Adrian James, MD
Professor of Otolaryngology – Head and Neck Surgery
University of Toronto
SickKids Hospital
Canada
Jose Carlos Casqueiro, MD
Hospital Universitario Severo Ochoa
Madrid, España
Alicia M. Quesnel, M.D.
Assistant Professor of Otolaryngology
Harvard Medical School
Massachusetts Eye and Ear Infirmary
USA
Janaina Leiti, MD
Resident of Otolaryngology
Fortaleza University
Brazil
Prof. Dr. Stefan Plontke
Chair of Otolaryngology
University of Halle-Wittenberg
Germany
Robert Owens, MD
Owens Ear Center
Plano, Texas.
USA
Agenda

1. What is essential to start with EES (J. Leiti)
2. Instrumentation: Current Problems and Potential Solutions. (A. James)
3. Power instrumentation in EES - current options and potential improvements. (A. Quesnel)
4. Perspectives about distal chip rigid endoscope (JC. Casqueiro).
5. The laser in middle ear as it relates to endoscopy (B. Owens)
6. Panel discussion.
